HOW TO SET MY BUDGET?

The total cost of your project is entirely down to how much you need from me to meet your project dreams which is why it's important to at least note a rough idea of what your project comprises.

For example here's a few things to consider:-

1. the number of songs or scope of the project;
2. is it just you, or a band, or an orchestra?
3. are you providing your backing musicians/vocalists or do you want me to?
4. are you well rehearsed, fit & well so there will be minimal takes?
5. have you prepared chord charts/scores or do you need me to?
6. will voices & instruments on the day be in excellent pitch & in tune with one another?
7. have you & your band worked with click tracks before so post recording timing adjustments are minimal?
